

SCADA and Industrial Process Controls

Electrical Instrumentation & Control Systems

An efficient controls system can reduce energy and operations costs and ensure that any facility, plant or production line is operating at peak performance. PSI implements turnkey instrumentation and control systems for clients in the public, Institutional, industrial federal and private sectors.

Our *SCADAPros* range of support services is PSI's flagship service program for bringing affordable and reliable service directly to where it is needed and can also help maximize the investment made in SCADA and IPC systems to maintain reliable operations.

PSI combines the power of a multidisciplinary Mechanical Electrical and Plumbing (MEP) and an environmental construction firm, with the implementation expertise of control systems integrators. Implementation assistance is provided with minimal, if any, downtime.

PSI's *SCADAPro* Mobile Services

PSI's mobile *SCADAPros* team is dedicated specifically to the support and maintenance of Supervisory Control and Data Acquisition (SCADA) and Industrial Process Control (IPC) systems, offering full service on instrumentation, control systems hardware, software, and electrical issues facing industrial processes, manufacturing, water and wastewater facilities

We offer the full range of services from minimal to more frequent support, based on budget, age of the equipment, and the complexity of the system. All clients receive a baseline assessment of the existing SCADA system, along with a risk evaluation and associated recommendations

PSI's *SCADAPros* team consists of experts with decades of experience in electrical and industrial controls, including programmable logic controllers (PLC) and human machine interface (HMI) programming. PSI's *SCADAPros* provides a cost-effective alternative to hiring in-house SCADA and industrial process controls staff.

PSI has offered 24/7 *SCADAPros* service to new and existing clients for over 20 years. In addition to emergency on-call service, *SCADAPros* contract customers receive scheduled maintenance visits to avoid potentially troublesome situations.

PSI's extensive list of *SCADAPros* clients throughout the US include:

- Pacific Gas & Electric (PG&E)
- Micrel Semiconductor
- Bell Helicopter (Textron Corp)
- California Dept of Toxic Substances Control (DTSC)
- General Electric
- Intel
- Advanced Micro Devices (AMD)
- Linear Semiconductor
- Blommer Chocolate
- Chevron
- Union Oil
- US Steel

PSI's mobile *SCADAPros* team has technicians conveniently located throughout the U.S. Our expert staff can be reached at (925) 456-8400 any time, day or night.
